

Strengthening Oklahoma Families

Pottawatomie County 2014 FCS Impacts

SELECTED ISSUES

Health

- 6,754 babies were born from 2005-2011
- 494 babies were born with low birth weight.
- 12% of the population has been diagnosed with diabetes
- 37% was estimated to be obese in 2010
- 34% have been found to be physically inactive

Hunger

- 15% of the county have been found to be food insecure
- 8% have limited access to healthy foods

Safety

- 3,085 (12%) of homes have severe problems

Finances

- \$42,255 is the median household income
- 18% of the county live below the poverty level

EXTENSION'S RESPONSE

Finances

20 adult participants completed evaluations which asked how they plan to change their behavior as a result of attending issue team programming

- 74% plan to regularly write down their financial goals

- 68% plan to regularly track income and spending
- 58% plan to regularly make a written spending plan
- 61% plan to regularly pay bills on time
- 72% are confident about their financial future

Health

11 adult participants completed evaluations which asked how they plan to change their behavior as a result of attending issue team programming

- 55% plan to eat a serving of fruit 2 or more times each day
- 50% plan to eat a serving of vegetables 3 or more times each day
- 64% plan to eat a whole grain food 3 or more times each day
- 33% decrease in those who plan to drink 1 or more sugar-sweetened drinks each day
- The Journey Through Health program was presented at a retirement community. Due to this program, residents requested a change to their meal service to include less salt, fewer fried foods, and more fruits and vegetables. As a result the dining service now includes a fruit and vegetable bar at each meal and alternative seasonings are being used in place of salt.
